# **TELLS WOMEN HOW** TO STOP CRAMPS

No Woman Should Have Those Awful Pains Each Month Now.

SIMPLE HOME REMEDY STOPS MISERY QUICK

MRS. GENE CASE

"History tells of many martyrs but none suffered prolonged or repeated torture or were forced to look forward each month to days of agony and pain like thousands of modern women do who are in misery each month at Menstruation time. Thousands in years gone by appealed to science and medicine for relief but until recently no way was known to relax the tiny internal muscles of the Vagina, Uterus, Ovary and Fallopian tubes which do the pulling and cramping at such periods. Sometimes hot drinks, hot applications and a day or so in bed would help. Other times only the Hyperdermic and a deadening of the nerves would ease the suffering. Little wonder so many girls grew prematurely old, haggard and bad looking.

Then over in Germany they found a harmless new powder that if swallowed with a glass of water would almost instantly relax those tight, contracted muscles and thus stop all signs of cramps and pain caused thereby. Today American chemists have solved that mystery too and you can buy this wonderful and harmless powder in 5-grain capsules at leading drug stores under the name of "Adams' Wonder Capsules" (named aite: the eminent chemist, H. A. Adams).

So great is the need of such a remedy among womankind and so wonderful is this great discovery that I am personally conducting demonstrations as fast as I can in every large city in the hopes of quickly acquainting every suffering woman with this gift of modern chemistry. What a wonderful step forward this is in humanity's war on pain and what a great boon to womankind. A simple, easy to take and harmless powder—just a swallow of water and then—all signs of suffering ache, pain, cramp and misery caused by these muscles, dirappear as if by magic.

"At the Laboratory here in America where these Adams' Wonder Capsules are made, they told me women would doubt and even old fashioned doctors would doubt and even old fashioned for the Poples Drug Stores and doing modern and the left in the particular in the hord passing on the positive guarantee of results with three doses o

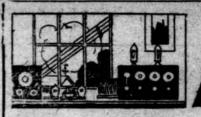

# **Common Sense About Eczema** and Eruptions!

Here's Something About S. S.S. That You'll Be Glad to Hear.

Tou might just as well know it right we the cause of skin eruptions, mples, blackheads, boils and so en, right in the blood. There is no getter away from it. Science has proved We prove it. You can prove it. When the cause of skin troubles and uptions is in the blood, it isn't com-

Let & S. & Gov You An Angelic Skin! men sense to simply treat the skin! A bottle of S. S. S. will prove to you what is happening in your blood. S.S.S. is a s-dentific blood cleaneer.—it drives out the impurities which cause eccema, tester, rash, pimples, boils, blackheads, blotches and other skin cruptions. When these impurities are driven out, you ban't stop several very nice things from happening. Your lips turn naturally roay. Tour eyes sparkle, your complexion clears, it becomes beautiful. Your face looks like that of a prosparous, ruddy, well-fed, refined gentleman, or if you are a woman, your complexion becomes the real kind that the whole world so admires. S.S. is also a powerful bedy-builder, because it builds new and more blood-calls. That's why it fills out sunken cheeks, bony necks, thin limbs, helps regain lost flesh. It costs little to have this happen to you. S. S. Is and at all drug stores, in two sizes are larger size is the more economical

Radio "reflectors" a new device, will greatly extend and popularize the use of wireless in the opinion of Senator Guglielmo Marconl.

Speaking to the Institute of Ra
Speaking dio Engineers and the American the cast. Institute of Electrical Engineers in

ventor predicted that by the use of the "reflector" and short wave wireless "beams," ships lost in storm will be able accurately to determine their own locations and find other vessels and lighthouses who searchlights can not be seen. He further predicted that radio will eventually be used to test the ignition and spark plugs of autos, and to talk from the office to the wife at home, without any neighbors cutting in and light that the span and the span and light the span and to talk from the office to the wife at home, without any neighbors cutting in and light the span and to talk from the office to the wife at home, without any neighbors cutting in and light the span and span s "Yellow Men and Gold" by Gouver-neur Morris, will be presented at Moore's Rialto beginning next Sun-day. Helene Chadwick as the delightbors cutting in and listening. Will Use Small Ripples. ful mistress of a Chinese rover Richard Dix as treasurer hunter.

Using the small ripples in the ether to convey the signals, rather than the waves of 2,000 or 20,000 sometimes used, Marconi has been able he said to direct messages than the waves of 2,000 or 20,000 sometimes used. Marconi has been able he said to direct messages accurately to given spots 90 miles away by means of his reflectors. Because radio waves can be reflected like light waves he has devised a method, he explained, of seattering them to all points of the compass. His "searchlight" consists of innumerable wires arranged in a special way on towers or masts.

With reflectors at both ends, ra-With reflectors at both ends.

Discovery Before Elec-

trical Engineers.

With reflectors at both ends, ra-dio speeches may be transmitted clearly 100 miles, Marconi asserted, and 200 times louder than is ordinarily possible.

Marconi declared that revolving reflectors would enable a "radio lighthouse" to guide a vessel at sea during fogs off a dangerous Test is Successful.

Test is Successful.

"The transmitter and revolving tower act as a kind of a wireless flash of beam by means of which it is possible for ships to ascertain the bearing and position of the lighthouse," he said. "In one test in have made, a steamer was able to take her bearings within one quarter of a point of the compass."

It should be possible, the inventor continued, to design apparatus by means of which a ship could project a divergent beam of short wave rays in any desired direction which rays, if coming across a metallic object, like another a steamer, would be reflected back to a receiver in the sending ship and thereby immediately reveal the presence and bearing of the other vessel whether or not it was equipped with radio.

The chief difficulty with short of Columbia, virial sinia, Maryland and Delaware, fair today and tomorrow; rising temperature west winds.

Lecal Temperature he 10 a. m. . . . . 75 10 p. m. . . . . 70 er Relative Humidity—8 a m., 86 per er. cent; 2 p. m., 56 per cent; 8 p. m. ing of the other vessel whether or not it was equipped with radio.

The chief difficulty with short waves, according to Marconi is that they are often interferred with by the ignition systems of with by the ignition systems of with by the ignition systems with by the ignition systems automobiles and motor boats. Some automobiles and motor boats, Some automobiles and motor boats. Some day, however, this fact will be turned to good account, he forcasts, for "short wave receivers will act as an accurate device for testing whether one's ignition is working all right."

TOMORRO# NIGHT CHEYY CHASE LAKE

**BETTER TONE INTO** Popularity Greatly In-

flated by Freak Stunts Ascribed by Many. Simultaneously with the introduction into the House of the radio bill, officials here see a marked im-provement in the general tone of

the radio art as practiced by man-ufacturers and distributors—expe-rienced or otherwise.

Although "freak" attempts to popularize the radiophone through outlandish apparatus and exag-gerated descriptions of abnormal "stunts" are still being brought to the attention of government au-thorities, nevertheless their number is conspicuously smaller than a few months ago, when radio was credited with doing everything from rocking the baby to sleep to com-municating with the spirit world.

Learning Fundamental Facts. The reason for this stabilization. it is pointed out, would seem to be that radio fans are at last learn-ing the fundamental facts about radio. However, throughout the period of what has been termed "hysterical growth," some truly scientific facts occasionally crept into radio demonstrations and displays. Now, it is believed, radio itself has put the "reverse English" on this "hysterical growth," and today occasionally some truly ri-diculous facts creep in where sci-entific facts crept in before. It is this conservation of "fire-

works" that will bring radio to the level of scientific usefulness now occupied by wireless telegraphy and the loud-speaking telephone. This level, officials believe, must be and is being sought by radio manufacand distributors because they fully realize that their future market lies not in the city so much as in the country. The farmer, it would seem, always "comes from Missouri," and radio companies have come to recognize this fact not only for their own benefit, but for the benefit of the radio art as Reaches \$70,000,000 Mark

It recently has been estimated that radio business will reach the \$70,000.000 mark this year. Inasmuch as government officials look for many times as much business next year, the enormity of radio telephony's importance can be grasped at once.

Probably the radio bill when passed will provide a "traffic committee" of twelve experts-six government and six private expertsto keep an eye on the progress of the art in its function as a public

utility. Although this body is not intended as a board of censors, nevertheless, it was said, a certain degree of condemnation or criti-cism of certain phases of present-day radio practices may be neces-sary in the interest of guiding the proper progress of the art. GUESTS AT RADIO PARTY HEAR FOXE
